	Modular Approval Requirement	Requirement Met	
(s If th in wo "C uss ap mo in in wh in ex mo mu	the modular transmitter must be labeled with its own FCC ID number, or use an electron display see KDB Publication 784748). Susing a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use ording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be sed. The Grantee may either provide such a label, an example of which must be included in the oplication for equipment authorization, or, must provide adequate instructions along with the odule which explain this requirement. In the latter case, a copy of these instructions must be cluded in the application for equipment authorization. The modular transmitter uses an electronic display of the FCC identification number, the formation must be readily accessible and visible on the modular transmitter or on the device in hich it is installed. If the module is installed inside another device, then the outside of the device to which the module is installed must display a label referring to the enclosed module. This atterior label can use wording such as the following: "Contains FCC certified transmitter odule(s)." Any similar wording that expresses the same meaning may be used. The user manual ust include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 15.212(a)(1)(vi)	⊠ - YES	□ - NO(*)

FC 15. per spr cor Sec typ	e modular transmitter must comply with any applicable RF exposure requirements. For example, CC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices rform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, read spectrum transmitters operating under Section 15.247 are required to address RF Exposure mpliance in accordance with Section 15.247(b)(4). Modular transmitters approved under other ctions of Part 15, when necessary, may also need to address certain RF Exposure concerns, pically by providing specific installation and operating instructions for users, installers and other erested parties to ensure compliance. 15.212(a)(1)(viii)	⊠ - YES	□ - NO(*)

* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here. **Details: <example - N/A>
